IPORA = International academic network

4 Countries

4 Universities

Addis Ababa University

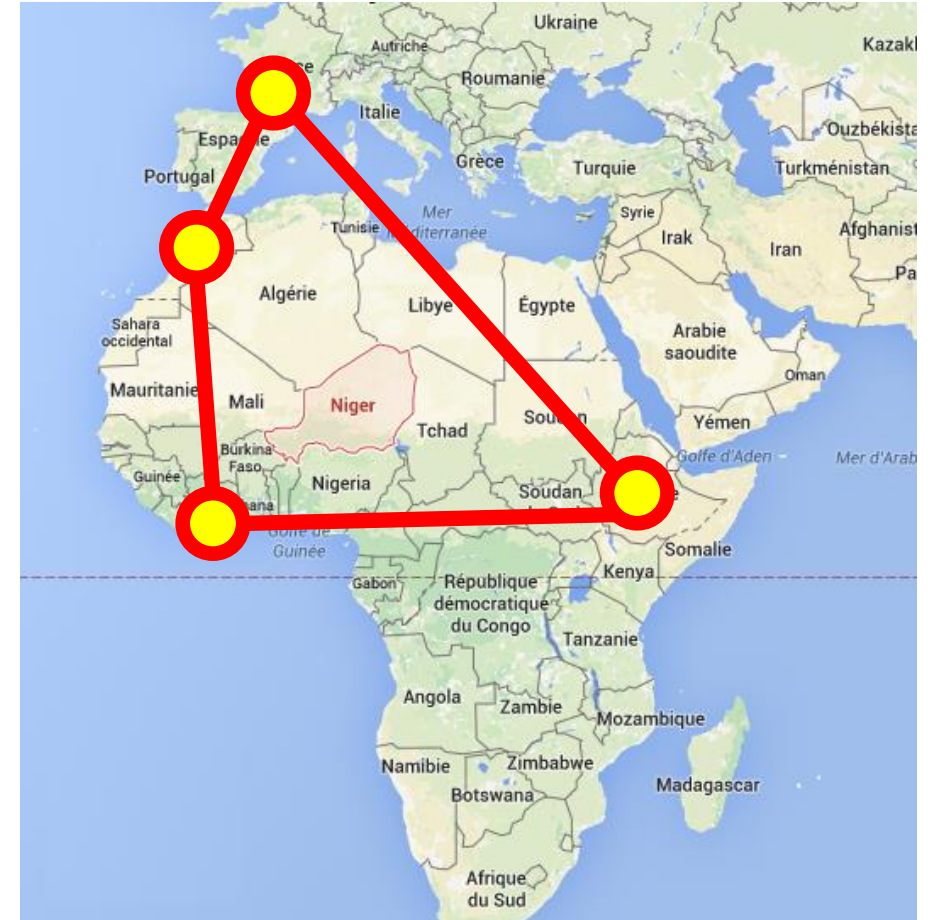

Université de Bordeaux and Sciences Po
Bordeaux

Université Félix Houphouët Boigny

Université Internationale de Rabat

And associated institutions: Inserm, IRD,
CNRS, Univ. Bordeaux-Montaigne

Goal : attract more institutions

IPORA = Interdisciplinary network

The founding teams work in:

- Public Health
- Economy
- Political Sciences
- Social-anthropology
- Law
- Physics of the environment
- Food systems

Goal : attract more disciplines

IPORA Objectives

To build an international **interdisciplinary** platform capable of:

- Studying the African challenges and identifying the corresponding policy-oriented research questions
- Co-constructing studies to answer these questions, with African researchers, beneficiaries, end-users and other stakeholders
- Strengthening interdisciplinary & multinational research capacities
- Training young researchers, technicians & engineers

We call **beneficiaries**... The population

We call **end-users**... The decision makers

We call **stakeholder**... Any individual or group with an interest or concern in our topics (universities, governments, public international organisations, NGOs, other civil society organisations, private companies...)

IPORA Structure

3 Axes

Develop the platform

Axis 1

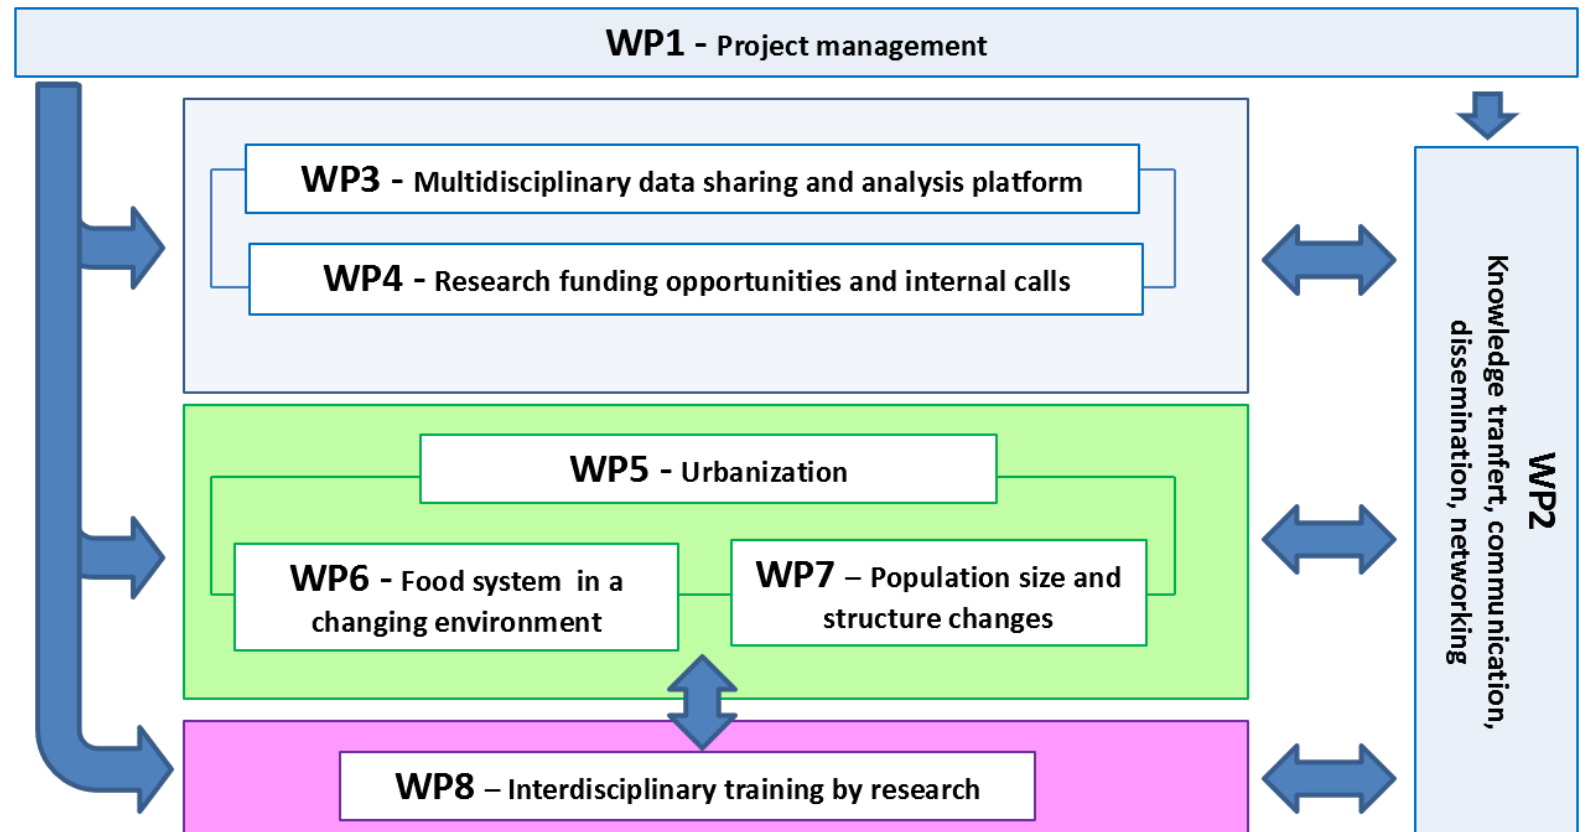

Conduct research

Axis 2

Train by research

Axis 3

8 Work Packages

Timeline & key deliverables
